Specialized Area - Oracle Apps

Specialized Skill - Oracle Apps Functional

Mandatory Skills

Oracle e-business Suite R12, Oracle 11g Database, Oracle Developer Suite 10g (Forms)

Job Description

Analyze science, engineering, business, and other data processing problems to implement and improve computer systems.

Analyze user requirements, procedures, and problems to automate or improve existing systems and review computer system capabilities, workflow, and scheduling limitations.

Assist with the analysis of existing complex programs and formulate logic for new complex internal systems. Prepare flowcharting, perform coding, and test/debug programs.

Develop conversion and system implementation plans. Recommend changes to development, maintenance, and system standards.

Provide implementation and production support for Oracle CRM applications. Develop, test, and implement product extensions and customizations.

Collaborate with internal and external teams such as Business and Product Development. Provide demonstrations to Business on proposed solution flows.

Review proposed Technical Solution flow with other teams
